

Going green means many things to different individuals as well as to different business enterprises. The OIG Green Initiative as provided through the utilization of our SaaS (Software-as-a-Service) based technologies; enabling organizations to reduce their dependency and consumption of paper products.

Our products quickly convert the product sourcing, procurement, fulfillment and payment process to a paperless workflow. Catalogs are also filled with 'green' product choices, delivered with all the value our customers deserve.

OIG Procure

The e-Procurement application offers companies the ability to reduce their need to generate paper. OIG Procure provides the following documents and delivery processes in an electronic format:

- Purchase requisitions
- Requests for quotes
- Purchase orders
- Order cancellations
- Product return requests

OIG Catalog

The e-Catalog application offers companies the ability to:

- Reduce their use of paper based catalogs for sourcing products
- Provide access to “green” product choices as available through OIG Certified Suppliers

OIG Fulfill

The e-Fulfillment application offers companies the ability to reduce the need to generate paper documents when managing the purchase order to fulfillment lifecycle. OIG Fulfill provides the following documents and delivery processes in an electronic format:

- Purchase Orders
- Ship Notices
- Invoices
- Return Invoices
- Cancellation Notices

OIG Payment

The PCI Compliant and CISP Certified e-Payment application offers companies the ability to reduce their need to generate paper checks via electronic payment options.
