

OIG

Innovation in Supply Chain Management

The Path is Clear

OIG Procure – For Buyers

OIG Procure offers a complete solution for your Purchase Order management process. This robust solution standardizes and automates the Procure – Pay - Reconcile cycle in a single environment.

OIG Procure allows you to manage and control every aspect of your corporate procurement process. Every aspect is fully configurable to your specific needs. No customization is needed

Shop via catalog, punch-out to a supplier website and transfer shopping cart items back into OIG Procure, create a spot buy or transform an RFQ response into a purchase order. The catalog browser alone is so functional, it begs the question, "How did we do without this for so long?" With favorite carts, simple or hierarchical searches, multiple product views, side-by-side product comparison capabilities, and complete product detail, your users are able to become smart and efficient shoppers-saving time and money for everyone.

The complete purchase order cycle is contained within OIG Procure. Buyers create Purchase Orders, then have complete access to cancel, receive, return and reconcile, by line item, against P-card and credit card statements.

OIG Procure gives you great flexibility with its reporting capabilities. Ad-hoc or standardized reports can be created, saved and shared with multiple user groups so visibility into the way your organization spends its money can be gained by those that need to know.

The key features of OIG Procure include:

- Hosted Catalog
- Buyer approval process for supplier updates
- Supplier Punch-out
- Spot Buy
- Request for Quote (RFQ)
- Secured supplier site
- Budget management
- Catalog management
- Flexible reporting and tracking
- Dynamic search capability
- Product Comparisons

OIG Solves Real Problems

OIG enables companies to implement an e-Business strategy, accelerate revenue and achieve bottom-line benefits. The OIG interactive platform reduces costs, errors and cycle times throughout the supply chain and provides the electronic integration needed to maximize the benefits of e-business.

Real Supply Chain Management

Because OIG gives you complete visibility and total understanding into your spending, this allows you to control spending –both in how it's being spent and who's spending it. This, in turn, allows you to leverage your spending and provides true cost savings and increased profitability.

Supply Chain Compression

By using a single application, suppliers standardize their transactions and streamline fulfillment across all their customer relationships. OIG also integrates with back-end Order Management systems to automate the entire Purchase Order life cycle.

About OIG

OIG is a leading provider of intelligent, robust, e-procurement Software-as-a-Service (SaaS) systems. OIG has built a sterling reputation for delivering superior technology in its proprietary, first-to-market supply chain management software suite.

OIG is headquartered in Auburn Hills, Michigan, OIG was established in 2005.
